PROJECTIONS

The past year has been one of the most important in the history of the University of Colorado. With little warning or fanfare the University found itself in the midst of an unprecedented financial crisis, a crisis so serious it threatened to undo the progress of the last half century.

Fortunately we have for now weathered that storm if not unscathed, at least not too much the worse for wear. In the process, both the University and the people of Colorado have had to initiate a comprehensive examination of the fundamental assumptions on which public higher education is based.

That reexamination is of enormous importance to both the future of the University and the state. Indeed, it may well be the most important thing to emerge out of this year's budgetary stresses.

Although it is by no means complete, already several important points have emerged:

— The people of Colorado are strongly committed to a comprehensive system of public higher education, both as a means of insuring that the next generation of young Americans will be intellectually prepared to meet the challenges of the 21st Century and as a foundation stone of the state's economic well-being in the decade ahead.

— The people of Colorado are not prepared to accept mediocrity in higher education. They want their institutions of higher learning to produce graduates that will be conversant with the most advanced thought of the day and will be full participants in the search for solutions to humanity's most difficult problems.

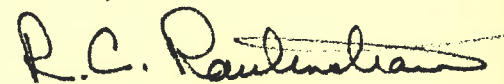

— The people of Colorado demand that their public institutions, including their institutions of higher learning, use their resources more efficiently and increase their productivity. At a time of some of the worst inflation in the history of the republic, the taxpayers will not permit the public sector to exempt itself from the sacrifices and exertions that are demanded of the private sector.

The University is in accord with all of these findings. We will continue to be guided by the proposition that the educated individual is the one who can discover things that have never before been known and do things that have never before been done. It is not enough for our graduates to know and do only that which has gone before.

By the same token, we are not prepared to continue conducting our own affairs only as they have been conducted in the past. At present, the University conducts some \$75 million of research — funded from federal and private sources — which insures that as an institution we are represented on the farthest frontiers of the human intellect. In the coming year, it is our intent to attack the problem of making the University more efficient and productive with the same intellectual rigor, imagination, and enthusiasm that is now devoted to our research into space travel, molecular biology, micro-electronics, and medicine.

While we do not underestimate the difficulty of accomplishing these goals, neither do we underestimate their importance. Certainly difficult days lie ahead, but I have every confidence that in the end we will succeed.

Sincerely,

R. C. Rautenstrauss
President
University of Colorado

ORDER OF EXERCISES

Professor Richard P. Francis, Presiding

Processional*

Invocation

Philip N. Olson

“America”

Dr. A. Paul Ballantyne

Welcoming Address

Chancellor Donald Schwartz

Remarks

President Roland C. Rautenstrauss

Conferring of Honorary Degree
Lowell Thomas

Doctor of Humane Letters, *honoris causa*

University of Colorado Medal
Dr. Charles L. Hinkle
Former Colorado Governor Stephen L. R. McNichols

University of Colorado Distinguished Service Award
Mrs. Peggy Marshall
Robert Mitchell

Campus Presentations

Teaching Award
Staff Award
Chancellor's Award

Dr. Eldon Stevens
Mrs. Zoe N. Bechtol
Dr. Robert A. Zawacki
Dr. Jose B. Fernandez

Conferring of Baccalaureate Degrees
Recognition of Outstanding Graduates

College of Letters, Arts and Sciences
College of Business and Administration
School of Education
College of Engineering and Applied Science

Samantha A. Meigs
Michael A. Satriano
Peter C. N. Pintler
Richard K. Nuth

Conferring of Advanced Degrees
Recognition of Outstanding Graduate

Graduate School of Business Administration

LOWELL THOMAS

Distinguished author, radio and television commentator, lecturer, explorer and father of cinerama, LOWELL THOMAS has earned worldwide renown and respect for his many accomplishments.

Although he was born in Woodington, Ohio, in the minds of many persons Thomas is considered a native of Colorado. His ties to the Columbine state go back to those early days in Cripple Creek where he began his most illustrious career as a reporter on the Cripple Creek paper.

As he wrote in his autobiography: "Cripple Creek at the heart of the Colorado Rockies goldfields was a marvelously appealing place . . . Best of all, to live at an elevation above 10,000 feet is to gain some special awareness of the world's breadth, and to be lured by its distances. From our mountain we could see the distant range of the Sangre de Cristo range, and I don't remember a time when I wasn't yearning to find out what lay beyond their farther slopes."

Restless and peripatetic, he has fulfilled that yearning, responding to the Siren's song from Cripple Creek to Samarkand and beyond, to the lands of history, mystery, and romance. In a career that spans six decades, his work as an author has carried

millions of readers, young and old, to high adventure across the world. His radio and television broadcasts from all parts of the globe, and his narration of the highly popular newsreels of the 1930s and 1940s, have made the warm and resonant voice of Lowell Thomas one of the most familiar ever to be heard.

As a producer and narrator of high-adventure television shows, Thomas brought a magnificent touch to the medium and earned great honors, including the Distinguished Service Award of the National Association of Broadcasters, and selection as Personality of the Year by the International Radio and Television Society.

Lowell Thomas's explorations, his books, and his role as a responsible commentator on world affairs have contributed immeasurably to the continuing education of people in our times. His spirit of adventure remains an inspiration to many.

Mr. President, in recognition of his innumerable contributions to our better understanding and appreciation of the world around us, I am honored to present Mr. Lowell Thomas, an adopted son of the State of Colorado, for the degree Doctor of Humane Letters, *honoris causa*.

University of Colorado Medal

CHARLES L. HINKLE

CHARLES L. HINKLE, enthusiastic, dynamic, energetic, an administrator and scholar whose dedicated leadership shaped the character of the Colorado Springs campus of the University of Colorado during its first fourteen years and gave visibility to his profession, the campus, the community, and the University.

Dr. Hinkle headed the College of Business and Administration in his first year on this campus, and during 1970-71 he became Vice Provost, the first resident chief administrative and academic officer. This was a critical period for UCCS, and Dr. Hinkle contributed enormously to the growth and success of the institution during this difficult organizational phase. Because of his national reputation as a scholar and teacher, he was able to attract a faculty that became role models for the younger faculty of today. Leaders of the campus and community alike remember well his work to establish a center for learning in Colorado Springs and his ability to motivate all toward excellence in education.

University of Colorado Medal

STEPHEN L. R. McNICHOLS

As Governor of Colorado from 1956 to 1963, STEPHEN L. R. McNICHOLS demonstrated a commitment to the well-being of the citizens of Colorado and a broad vision of the state's future.

He used a budget surplus to advance the state's health and education programs, and he recognized the needs of people throughout Colorado for improved educational opportunities. The University of Colorado especially felt the effect of his decisions. The building of Colorado General Hospital was made possible with state matching funds. The Medical Center achieved its first full-time resident faculty. The Boulder campus launched a new drive for excellence in its science programs, again with the help of a commitment from the state.

A principal beneficiary of Steve McNichols' vision is Colorado Springs and its environs, through his determination to accelerate the development of a complete University campus to serve the people of El Paso County. That decision was instrumental to the location in the Pikes Peak area of national companies that were attracted by University programs and courses for their personnel.

University of Colorado Distinguished Service Award

PEGGY MARSHALL

For more than a quarter of a century, the work of MRS. PEGGY MARSHALL on behalf of the developmentally disabled has benefited hundreds of persons. Her accomplishments are a testament to unselfish dedication and devotion to her cause.

Peggy Marshall was the first president and a founding director of the El Paso County Association for Retarded Citizens. She is now serving her third term as a member of its board of directors.

She was the driving force behind the formation in 1961 of the Pikes Peak Inter-Agency and Citizens Commission for the Mentally Retarded and Seriously Handicapped. That organization today is the Mental Retardation Commission, and Mrs. Marshall serves as secretary.

An original incorporator of the Cheyenne Village, a residential training center for the adult retarded that has achieved a national reputation, she was its secretary from 1967 to 1969 and president from 1970 to 1973. She now is an honorary life member of the board and an active fund raiser for the Village's projects.

Mrs. Marshall established in her own home a recreational

In the spring of 1977, Dr. Hinkle was asked once more to assume the leadership of UCCS as acting chancellor and he responded with his usual dynamic and energetic style. To all of his responsibilities, Dr. Hinkle brings an extraordinary degree of professional expertise, enthusiastic dedication, unwavering attention to organizational goals, and a success-oriented attitude. His name ranks high on a very short list of leaders who have had a central role in building the University of Colorado at Colorado Springs.

In recognition of his achievements, and particularly in appreciation of his dedicated service to this University, the Board of Regents is honored to present the University of Colorado Medal to Dr. Charles L. Hinkle.

The presence of Hewlett-Packard, Digital Corporation, NCR Corporation, and Litton Industries has been a major factor in the unprecedented growth of the industrial and business base since the mid-1960s. The Pikes Peak area now has the second largest population in the state and is known throughout the country as a region that fosters "good living."

Establishment of the University at Colorado Springs has given great individual satisfaction as well. Thousands of citizens have found the opportunity to advance their careers and expand their personal lives; that opportunity continues to be a major factor in the intellectual and cultural life of the Colorado Springs community.

For his outstanding contributions to the state of Colorado, but especially for his pioneering support of the University at Colorado Springs, the Board of Regents is proud to present the University of Colorado Medal to former Governor Stephen L. R. McNichols.

program for the retarded that is now conducted by the city's Park and Recreation Department. The Handicapped Children's Mothers' Club has met at her residence since 1964.

Mrs. Marshall was instrumental in obtaining a major donation to establish the Chromosome Lab at Penrose Hospital and a second donation to hire an executive officer for the Association of Retarded Citizens.

Peggy Marshall has contributed to the Colorado Springs community in other ways as well. Since 1952, she has been a docent at the Colorado Springs Fine Arts Center. She has served with her husband as co-chairman of the Contemporary Art Society. She established a luncheon, music, art, and dance program that is held twice a month in her home for children in the Special Education Program of School District 11.

In recognition of her outstanding service to the people of the Pikes Peak community and the State of Colorado, the Board of Regents is pleased to award the University of Colorado Distinguished Service Award to Mrs. Peggy Marshall.

University of Colorado Distinguished Service Award

ROBERT MITCHELL

A leader of young people and an innovator in building bridges across the generation gap, distinguished in training other leaders and instrumental on an international scale in helping young people clarify the confusion of contemporary society: All of these are appropriate designations for ROBERT MITCHELL.

Born in Dallas, Texas, he first came to Colorado as a young camper himself and then as a counselor and leader of young campers. For years he brought bus loads of high school campers from the San Francisco Bay area to Star Ranch near Colorado Springs and Frontier and Silver Cliff Ranches near Buena Vista.

A key figure in the development of Young Life, Bob Mitchell helped to propel the organization into what is known as the leading co-educational adolescent camping program in the United States. He has been a major force in shaping a unique approach that emphasizes one-to-one friendships between adult leaders and young men and women on their high school campuses and in the streets of their neighborhoods.

Following ten years as Field Director of Young Life's work in the United States and other countries, Bob Mitchell moved into a new position as Vice President of Training for the organization. Now as President of Young Life, "Mitch," as he is known to thousands, heads an international, 40-year-old thrust into the youth culture.

Bob Mitchell's influence extends far beyond Colorado, and he has been a principal figure in Young Life's work in recent years in South and Central America, Europe, Africa, and Asia.

For his positive moral and spiritual leadership, and for his work as a distinguished citizen of the state and nation, the Board of Regents is pleased to award the University of Colorado Distinguished Service Award to Robert Mitchell.

Receiving this award for Mr. Robert Mitchell will be Dr. James Oraker.

THE NORLIN CHARGE TO GRADUATES

(From the baccalaureate address by President George Norlin, of the University of Colorado, June 1935.)

"You are now certified to the world at large as alumni of the University. She is your kindly mother and you her cherished sons and daughters.

"This exercise denotes, not your severance from her, but your union with her. Commencement does not mean, as many wrongly think, the breaking of ties and the beginning of a life apart. Rather it marks your initiation in the fullest sense into the fellowship of the University, as bearers of her torch, as centers of her influence, as promoters of her spirit.

"The University is not the campus, not the buildings on the campus, nor the faculties, not the students of any one time—not one of these or all of them. The University con-

sists of all who come into and go forth from her halls, who are touched by her influence and who carry on her spirit. Wherever you go, the University goes with you. Wherever you are at work there is the University at work.

"What the University purposes to be, what it must always strive to be, is represented on its seal, which is stamped on your diplomas — a lamp in the hands of youth. If its light shine not in you and from you, how great is the darkness! But if it shine in you, today and in the thousands before you, who can measure its power?

"With hope and faith, I welcome you into the fellowship. I bid you farewell only in the sense that I pray you may fare well. You go forth, but not from us. We remain, but not severed from you. God go with you and be with you and us."

ACADEMIC DRESS

The tradition of the academic costume apparently began during the twelfth or thirteenth century in the early European universities. Since the clergy composed the majority of the educated class, academic dress is an adaptation of the cope or mantle which was usually of silk or wool, and worn by church dignitaries in religious processions.

Through the years, great diversity in color and in style of cap, gown and hood developed. In 1896, the colleges and universities in the United States adopted a uniform code governing academic dress. Today, the black gown, hood, and mortar board worn by the graduates in most institutions follow this code.

While it is not apparent to the casual observer, the gowns worn by the recipients of the various degrees vary somewhat in design. The sleeves of the gown worn by the baccalaureate candidate are long and pointed, while the sleeves of the gown

worn by the master's degree recipient are square at one end with a slit at the elbow. The doctor's gown has flowing sleeves with three bars of velvet, and a facing of velvet down the front of the gown.

Those who receive a master's or a doctor's degree from the University of Colorado wear hoods lined with the school colors, silver and gold. The hood worn by the doctor's candidate differs in design from that of the master's as it has side panels and is slightly longer. The velvet border of the hood indicated the degree and usually follows the same code as the color of the tassels.

The oxford cap, usually referred to as a mortar board, is black and has a long tassel which is fastened by a button on the top. Candidates for the baccalaureate degree wear the tassel pendant over the right front of the cap before the degree is conferred, then it is worn on the left side.
